Professional Summary

I'm a Full-Stack Developer specializing in crafting cross-platform mobile experiences with React Native and Node.js.

Technical Skills

- React Native, React, Redux, Tailwind CSS, Styled-Components, Framer Motion
- Node.js, Express.js, Socket.IO, RESTful API design, Microservices
- MongoDB, MySQL, Knex.js, Firebase
- Git, GitHub Actions, Jenkins, Fastlane, Sentry, Firebase Crashlytics
- Jest, React Testing Library, Detox, Postman

Professional Experience

Lezzoo, Erbil, Iraq

Full-Stack Developer | Jul 2023 – Present

- Designed, developed, and maintained Lezzoo Customer App (React Native) with real-time order tracking.
- Built and integrated Node.js/Express microservices for authentication, ordering workflows, and payments.
- Implemented Socket.IO-driven features for live order status updates; manages state via Redux and Context API.
- Enhanced performance by enabling Hermes engine, reducing bundle size, and profiling slow renders.
- Led code reviews and mentored junior developers on React Native best practices and TypeScript.
- Configured CI/CD pipelines (GitHub Actions, Fastlane) for automated builds, tests, and deployments.

Education

Salahaddin University-Erbil

B.Sc. in Computer Software Engineering | 2021 – 2025

Certifications

- React Native – Udemy
- Advanced JavaScript – codedamn
- MongoDB Performance Optimization – Udemy
